

Knowledge is very important thing in our life.

We need to pay attention to see that we get as much knowledge as possible.

We should not let go any chance to learn more.

There are a few things we should remember as we study. (00)

They are:

Study with humbleness.

Do not be very proud when you study.

Study silently.

Study with attention/ concentration.

Learn new lessons every day.

Do not forget what you have studied.

Add to your knowledge.

Respect your teacher.

Go to religious school
regularly.

Do not throw your
books and note books
carelessly

Do not bend your books
and note books and
do not spoil them.

Do not sit on your books
and notebooks.

Do not get bored with learning.

While studying keep
all the things properly.

We celebrate the festival "Jnana Panchami".

It symbolizes worship of knowledge.

The knowledge helps us to be free from the suffering of this worldly life.
